CICOES Profile: <https://cicoes.uw.edu/internships/interns/sirray-smith/>

TEAM-UP Profile: <https://www.teamuptogether.org/scholarship-recipients/sirray-smith>

EDUCATION

City College of New York, New York, NY 2028

Masters of Science, Earth and Atmospheric Science, GPA: N/A

NOAA EPP CESSRST Cohort 5 Fellow

Morgan State University, Baltimore, MD 2026

Bachelor of Science, Physics, GPA: 3.5/4.0

FUSE Scholar, NIH-RISE Program, NPT Fellow, TU-T Scholar

EXPERIENCE

Morgan State University, Baltimore, MD September 2025

Research Assistant

- Understanding the physics of the Mesoscale Convection Systems in West Africa
- Reading and understanding the satellite data using IDL

University of Washington, Seattle, WA June 2025

CICOES Intern

- Found the maximum geothermal flux constraint of ice rises in Antarctica using an ice-and-heat flow model
- Worked through finding ice characteristics throughout different research papers to compare the maximum geothermal flux to past mapping of geothermal flux, allowing for better assessing of mapping in Antarctica
- Presented research through both an oral and poster presentation

Morgan State University, Baltimore MD January 2024

Research Assistant

- Assembling of a desktop cosmic muon detector for measuring properties associated with cosmic ray muons
- Developed programming skills in micro-controllers and data analysis skills
- Learned how to solder surface mount components on small PCB

Brookhaven National Laboratory, Upton, NY June 2024

Intern

- Designed and simulated circuit boards
- Testing the LArASIC chip for noise and crosstalk between 16 different channels and analyzed the data to see where any improvements can be made on the prototype, on the nEXO project.
- Presented research through both an oral and poster presentation

Morgan State University, Baltimore, MD June 2023

Research Assistant

- Designed and simulated ultra-wide bandwidth antenna

- The antenna's goal was to reach under -10 decibels and achieve an ultra-wide bandwidth to be used for quantum sensing and communication purposes.
- This goal was achieved due to the antenna having an overall 90% efficiency covering a range of 10.41 GHz
- Presented data and received feedback on research project

SKILLS

Programming languages: Python, MATLAB, IDL

Computer Skills: Microsoft Office, CITI Certification, High Frequency Structural Simulator, KiCad, Google Suites, IDL

ACTIVITIES

Sigma Pi Sigma	2025
Society of Physics Students	2024
<i>President, 2024-2026</i>	
National Society of Black Physicists	
National Society of Negro Woman	2022
National Honor Society	2020
<i>Secretary, 2021-2022</i>	
National Society of Black Engineers, Jr.	2020
Burlington City High School Woman's Basketball	2018
<i>Manager, 2022</i>	
Burlington City High School Woman's Soccer	2019

VOLUNTEER EXPERIENCES

Mentor and Tutor for the Morgan State Department of Physics and Engineering Physics

- Mentored freshman in physics to become acclimated to the department
- Assisted with tutoring in general physics 1 and 2
- Available for one-on-one sessions, both in person and online

Peer Bear Mentor for The School of Computer, Math, and Natural Sciences

- Mentored incoming freshman prepare for their college experience, such as setting achievable goals during the semester
- Assist with tutoring and general questions regarding college
- Available for one-on-one sessions, both in person and online

Assistant Coach for Burlington City Middle School Boys' and Girls' Basketball

- Coached along with another to assist young students with building basketball skills
- Work with the youth to gain confidence in sports and academics
- Provide mentoring to the middle school girls

BARCS Animal Care and Rescue Shelter

- Assisted prospective families with the adoption process
- Performed secretarial work to help keep the shelter organized

AWARDS AND SCHOLARSHIPS

REFERENCES

TEAM-UP Together Scholarship

2025

EPSS for Outstanding Poster at NSBP/NSHP

2025

Dr Stacyann Nelson: Professor, Morgan State University

stacyann.nelson@morgan.edu

Dr. Amanda Dotson: Professor, Morgan State University

(443)-885-3753, amanda.dotson@morgan.edu

Dr. Veeshan Narinesigh: Chairperson, Geophysical Fluid Dynamics Lab

(609)-452-5851, veeshan.narinesigh@noaa.gov

Mr. Christopher Mosley: Student Success Coordinator, Morgan State University

(443)-885-3328, christopher.mosley@morgan.edu
